Overview

AHLCO is a general contracting company founded in 1991 in Beirut by its owner Eng. Antoine Abou Halloun. We offer a multitude of contracting services including structure, architecture, electromechanical, landscaping, public works, infrastructural works and real estate development.

Our large experience and perfectionist spirit keep us up to our clients' expectations. Quality and punctuality are our priorities, ensuring our excellence.

We plan for every detail in our projects, taking into consideration all the available resources and the time factor in order to provide the most effective service possible.

Perfection is our law, excellence is our standard. Forward, always.

Our Goals

Our main inspiration is the Lebanese heritage. AHLCO is not only about building for the present; we believe that we should restore an undying past for a promising future, preserve our architectural heritage and breathtaking landscapes for the rising generations.

This vision is reflected in all the renovation works we've achieved, all the green initiatives we've taken and all the innovational works our company's accomplishing year after year, and the best is yet to come.

Our Scope of Work

AHLCO's projects stretched over the years from renovations to full designs and executions, both administrative civil, religious, historical and military buildings.

Our works consist of real estate development, buildings construction and renovation, road and public works, steel structural works, waterproofing, landscaping, and monuments restoration and more.

Our Crew

AHLCO Headquarters in Achrafieh and office in Jdeideh employ more than 20 experienced architects, civil, mechanical and electrical engineers and technicians from different backgrounds.

Our Chairman and CEO Antoine Abou Halloun is a senior civil engineer with a vast experience and knowledge in both study and execution levels
